# **45° IN THE SHADE 35° IN YOUR CAMPER**

---

*We've spent a few years getting this one exactly right for our unique Australian conditions: hot, bumpy, extreme. They also perform well in the prevailing conditions of Germany and Canada. All natural canvas breathes; it offers sturdy support while our clever tent design makes the most of any slight waft of breeze you might be lucky enough to experience in the desert, and directs the air flow through the space.*

## WARM AND DRY IN THE COLD AND WET

---

*Just like your skin when it gets cold, the pores tighten up on a 3 Dog Camping canvas tent in winter to keep those cold breezes out. The sturdy construction will comfort you when the wind is blowing, while double covered windows will resist dampness, rain torrents and frosty dew. Hooded awning style windows provide shelter while maintaining privacy in your home away from home. Ahhh, the romantic sound of rain pitter-pattering on the roof.*
